The World Around Us

1974

By 1974 the United States was making moves to adjust to a milieu of seeming crises. The Alaskan pipeline was approved, Kissinger's negotiations in the Middle East finally resulted in an accord, while the Republican Administration was increasingly under fire in the Watergate investigations. Americans were horrified at the kidnapping of Patty Hearst and amazed at the resignation of Nixon's top aides, and also intrigued by Mariner 10's fly-by of Mercury, Hank Aaron's 715th home run, and Russia's deporting of Solzhenitsyn. In July, the American political crisis came to a head with the subpoenaing of Nixon's tapes, his resignation in August, and Ford's pardon in September. Finally, Ford approved private ownership of gold and the Oil Embargo was lifted.

The World Around Us

1975

In 1975 the United States began its adjustment to a world where events seemed to out-run our capacity to absorb them. While Rockefeller began investigations into the misdeeds of the CIA and Ford announced the U.S. was in a recession, the Bicentennial celebrations officially began. In April, Vietnam again entered the news as the remaining U.S. personnel had to be evacuated from Saigon. Meanwhile, New York City was in the midst of financial crisis. The danger of aerosol sprays to the atmosphere, an assassination attempt on Ford, the UN declaration of Zionism as a form of racism, and the dictatorial emergency in India were other newsworthy events.

The World Around Us

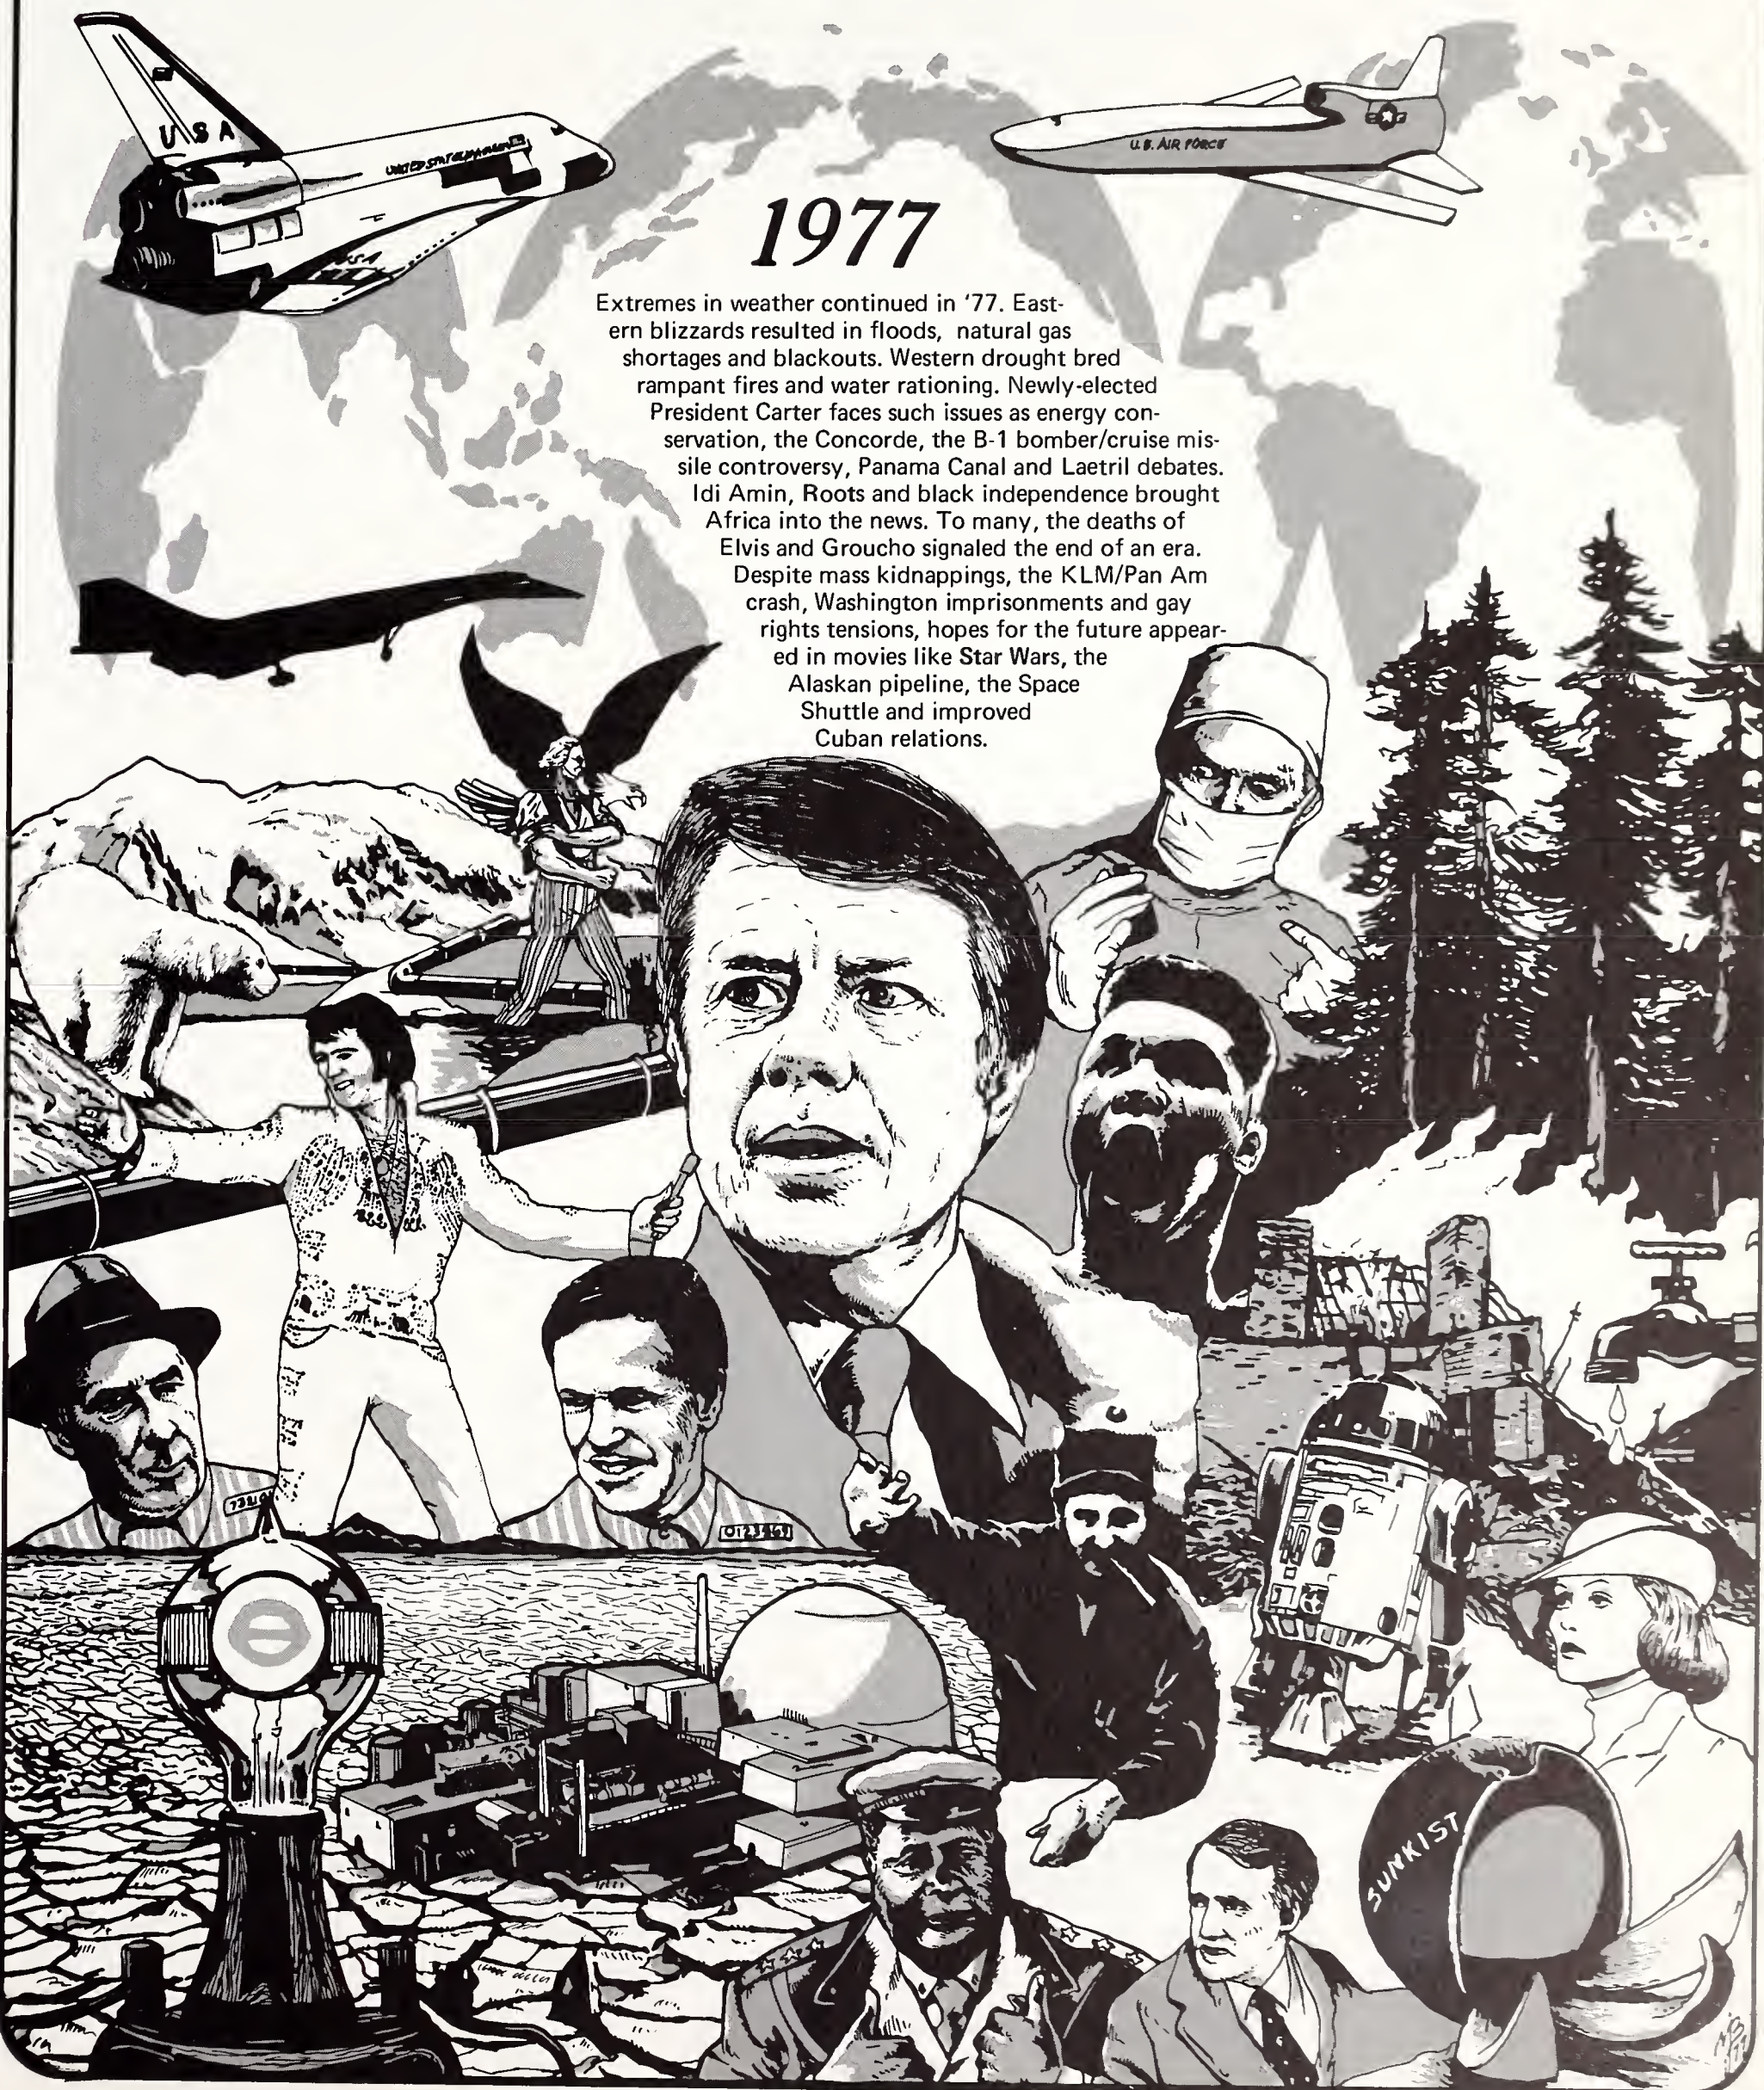

1976

America demonstrated its capacity to adapt in 1976. Old faces reappeared and new faces stepped forward to provide new hopes. The Winter Olympics, Surveyor's Mars photos, the national political conventions and the election of Jimmy Carter dominated the news and TV screens. The U.S. began to celebrate our 200th birthday. Marijuana was decriminalized in California, a new investigation of the Kennedy and King assassinations was begun, and in Congress a new scandal began as a result of Elizabeth Ray's revelations. Meanwhile, old faces made one last appearance as Eldridge Cleaver returned to the U.S. for trial, Mao died in China, and King Kong returned to New York in an oil tanker.

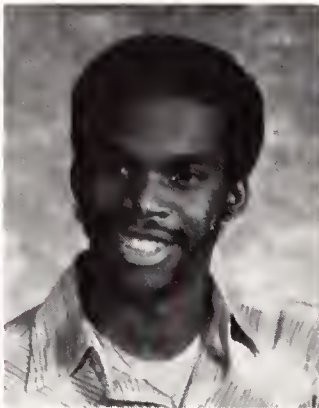

The World Around Us

Extremes in weather continued in '77. Eastern blizzards resulted in floods, natural gas shortages and blackouts. Western drought bred rampant fires and water rationing. Newly-elected President Carter faces such issues as energy conservation, the Concorde, the B-1 bomber/cruise missile controversy, Panama Canal and Laetril debates. Idi Amin, Roots and black independence brought Africa into the news. To many, the deaths of Elvis and Groucho signaled the end of an era. Despite mass kidnappings, the KLM/Pan Am crash, Washington imprisonments and gay rights tensions, hopes for the future appeared in movies like **Star Wars**, the Alaskan pipeline, the Space Shuttle and improved Cuban relations.
